Have Questions? Need Assistance? We are here to help!

If you need any type of assistance please call on us. We are happy to help.
We simply ask you do the following before contacting us:

1. Read the appropriate instructions and associated product information thoroughly. If you have misplaced the instructions, they can be found online at either website listed at bottom of this page.
2. Should you need to contact us directly for assistance, please be prepared to spend the necessary time required to properly diagnose a problem or answer a question thoroughly. Most detailed diagnostics require either extended phone conversations or 2 - 4 detailed email communications.
3. Technical support is available Monday through Friday between 8:00am and 4:30pm central time. If you need assistance outside of those hours, leave a voice mail with your name, telephone number and a brief message. All voice mail and emails will be answered within one business day.

Morley® and Ebtech® products are warranted for two years from date of purchase. You do not need to register your product. You will need a copy of your dated purchase receipt for warranty service.

A nominal fee will apply to warranty work without a dated purchase receipt.

For technical support, customer service, diagnostic service or assistance of any kind for products shown in this catalog:

ABY Selector Combiner Switch

- Route one signal to two outputs or two inputs to one output. Then, choose between A or B individually OR combine both A & B simultaneously!
- Route one guitar to two amplifiers. Switch back and forth or combine amps for different guitar tones.
- Route two guitars to one amplifier. Makes guitar changes quickly.
- Have that backup guitar ready if you break a string!
- Silent tuning. Hook up an amp to A and a tuner to B. You can tune silently or hit combine switch to tune while playing.
- Cold-Rolled Steel Housing, Two-Year Warranty and Made in the U.S.A.

Model
ABY

George Lynch Synch Tripler

George Lynch
www.georgelynch.com

Model
TRIPLER

- Route your guitar signal to three amps.
- Select or combine any combination of all three outputs.
- Boost knob ensures you get max guitar level to all three amps.
- Each channel has LED indication so you know what's on or off.
- Powers off one 9V battery or optional Morley 9V adapter.
- Cold Rolled Steel Housing will withstand years of use and abuse.
- Get that thick, ferocious tone that only a three amp set-up can provide.
- Two Year Warranty & Proudly Made in the U.S.A.

ABC

Selector Combiner Switch

- Route three guitars to one amp!
- Select a guitar with a click of switch.
- Route one guitar to three amps!
- Selector or combine any combination of all three amplifiers.
- Handy LEDs show which guitar and which amplifiers are on or off.
- Passive circuit (no power required).
- For LED indication, one 9V battery or optional Morley adapter is required
- True Bypass: prevents volume loss or tone change
- Enclosed in sturdy cold-rolled steel housing
- Two-year Warranty & Proudly Made in the U.S.A.

Model
ABC

Model
QUAD

QUAD BOX

- Switch back and forth between two guitars with the click of a footswitch
- Switch between or combine 2 amps
- Handy LEDs show which guitar and which amplifiers are on or off.

QUAD

MORLEY® 9V Adapter

Using other brand adapters may cause your Morley® to hum. Please use only Morley® adapter.

**Morley®
European 9V**

**Morley®
USA 9V**

SPECIFICATIONS:

USA VERSION

INPUT: 120 VAC/60Hz/8.4VA

OUTPUT: 9VDC, 300Ma

POLARITY: CENTER NEGATIVE

DIMENSIONS: 2.20" (L) x 1.97" (W) x 1.74" (H)

PLUG DIM: 0.22" (OD) x 0.08" (ID) x 0.44" Plug Length

EUROPEAN VERSION

INPUT: 220 VAC/50Hz/8.4VA

OUTPUT: 9VDC, 300Ma

POLARITY: CENTER NEGATIVE

DIMENSIONS: 2.84" (L) x 1.97" (W) x 2.20" (H)

DIMENSIONS: 72.14mm (L) x 50.04mm (W) x 55.89mm (H)

PLUG DIM: 0.22" (OD) x 0.08" (ID) x 0.44" Plug Length

PLUG DIM: 7.22mm (OD) x 2.03mm* (ID) x 11.18mm Plug Length

We use a regulated power supply. This means that rather than place this additional circuitry in the pedal, we put it in the adapter. Why? Better battery life and less circuitry in our pedals to keep your guitar's volume and tone pure!

- 9VDC 300mA Regulated Power
- Compatible with Boss, Budda, Danelectro, DOD, Dunlop, Ibanez, Marshall, Real McCoy, Snarling Dog & others.
- Handy LED shows power is on
- Regulated power supply mean less noise on standard pedals and no hum on pedals that require a regulated supply (like Morley® pedals for example).
- 300mA allows you to run more pedals off of one power supply.

HUM X™

Ground
Hum
Exterminator

All Musician's know that hum and buzz do not contribute to great sound. Also, ground hum can be very hard to diagnose and get rid of, especially when time is ticking away before a show or in a studio. Many will resort to the use of a ground lift adapter but we all know that is not the best or safest way.

Model
Hum X

Suitable for use on
any grounded 120V outlet.
Max Current: 6 Amps

The Hum X™ filters out unwanted low voltage from ground line that causes ground loop hum while simultaneously maintaining the ground. Simply place the Hum X™ on the end of the power cord of the equipment that has a ground hum and plug the Hum X™ into the wall outlet. Hum is gone and audio signal remains intact. Easy to use and completely effective!

Hum X
Used by:

Jon Lee
Static-X, Billy Idol

Brian Sateia
Alice Cooper

Mike Sokol
Hector La Torre

Hum Eliminator™

Eliminates ground loop hum. Also converts balanced and unbalanced signals.

Do you hear hum or buzz in your audio signal? Are long unbalanced lines across stage creating noise problems? Most AC hum (60Hz in the US 50 Hz in Europe), is caused by ground loops. These ground loops act like radio antennae picking up hum and noise. The Hum Eliminator™ completely eliminates this by breaking the ground loops, making it impossible for the signal lines to pick up the AC hum and noise in the first place. Just place the Hum Eliminator™ on the cable connections between the offending pieces of equipment and you're done. Quick and easy. No more buzz or hum. No signal degradation. No filtering. No noise gates. No dangerous ground lifts.

Model HE-2: Two
Channel Hum
Eliminator™
with 1/4"
"Smart Jacks"
(TS or TRS)

Model HE-8: Eight Channel Hum Eliminator™ with 1/4" "Smart Jacks" (TS or TRS)

Model HE-2-XLR:
Two Channel Hum
Eliminator™ with
1/4" "Smart Jacks"
and XLR Jacks

Model HE-8-XLR: Eight Channel Hum Eliminator™ with XLR Jacks

Rack units now equipped with
easily reversible rack ears

- Eliminates AC hum / 60Hz buzz and noise
- Breaks ground loops safely while leaving all signal grounds intact
- Completely passive design (requires no power)
- Converts automatically between balanced and unbalanced lines
- 1/4" TRS "smart" jacks (tip, ring, sleeve) inputs and outputs
- Automatically translates signal voltages to match difference in ground potential
- Frequency response 20Hz to 70kHz +/- 0.5dB
- Distortion less than 0.005% THD @ 1kHz
- Crosstalk better than -97dB
- Maximum source impedance 1kOhm. Minimum load impedance 10kOhm
- Two-Year Warranty
- Proudly Made in the U.S.A.
- HE-8 and HE-8-XLR are single rack space 19"L x 1.5"H x 6.5" deep
- HE-2 and HE-2-XLR dimensions 3.5"L x 4.75"W x 1.5"H (w/bumpsons)

Line Level Shifter®

Increase or decrease signal voltage (-10dBV and +4dBu) without adding noise. Also eliminates ground loop hum & converts balanced and unbalanced signals.

What do you do when you need to connect a low volume, -10dBV output (like a cassette deck or CD player) into a high volume, +4dBu input (like a multi-track recorder or DAT machine)? Get the Line Level Shifter®. The Line Level Shifter® uses the physics of inductance and impedance matching to increase or decrease the signal voltage without the added noise of active electronics. The Line Level Shifter™ also converts back and forth between balanced and unbalanced signals automatically. This is great because most -10dBV signals are unbalanced and most +4dBu signals are balanced. The Line Level Shifter® also contains Ebtech's Hum Eliminator™ technology to break ground loops that cause AC hum.

Model LLS-8: Eight Channel Line Level Shifter® with 1/4" Smart Jacks® (TS or TRS)

Model LLS-2: Two Channel Line Level Shifter® with 1/4" Smart Jacks® (TS or TRS)

Model LLS-2-XLR: Two Channel Line Level Shifter® with 1/4" Smart Jacks® and XLR Jacks

Model LLS-8-XLR: Eight Channel Line Level Shifter® with XLR Jacks

Rack units now equipped with easily reversible rack ears

- Completely passive design (requires no power)
- Converts back and forth between -10dBV and +4dBu
- Converts automatically between balanced and unbalanced lines
- 1/4" TRS "smart" jacks (tip, ring, sleeve) inputs and outputs
- Built in Hum Eliminator™ technology eliminates AC hum/60Hz buzz/noise
- Automatically translates signal voltages to match difference in ground potential
- Frequency response 10Hz to 40kHz +/- 1dB into 10kOhm load
- Distortion less than 0.002% THD @ 1kHz
- Crosstalk better than -97dB
- Maximum source impedance 1kOhm. Minimum load impedance 10kOhm
- Two-Year Warranty
- Proudly Made in the U.S.A.
- LLS-8 and LLS-8-XLR are single rack space 19"L x 1.5"H x 6.5" deep
- LLS-2 and LLS-2-XLR dimensions 3.5"L x 4.75"W x 1.5"H (w/bumpsons)

Swizz Army 6-in-1 Cable Tester

Model Swizz-CT

INSTALLED CABLE TESTING: Great for diagnosing cables that are inside building walls. Connect the Swizz Army 6-in-1 to one end of the cable to see if any lines are shorted together. Then, connect a shorting connector onto the other end of the cable and see if the lines are good.

CHECKS 6 CABLE TYPES
Checks XLR, 1/4", RCA, 1/8", TT & MIDI cables for continuity and/or intermittent connections. Also detects opens and shorts for each pin.

TEST TONE GENERATOR:
Generates a 1kHz (440Hz) tone at +4dBu, -10dBV and mic levels.

Runs on 2 AA batteries (not included). Two-Year Warranty.

PHANTOM POWER DETECT: Displays when a DC voltage present on Pin 2 (tip) and Pin 3 (ring), individually.

GROUNDING SHIELD DETECT: Confirms that the XLR connector shield is connected to Pin 1 (grounded).

CABLE WIRING DISPLAY: Clearly shows which pin is wired to what. The Cable Wiring Display clearly shows continuity, opens and shorts for each pin. This also perfect for determining custom/adaptor wiring - such as XLR-1/4", 1/8" stereo dual RCA, etc...

INTERMITTENT DETECT AND DISPLAY:
Normally when testing for intermittent shorts, if you blink while testing for a short, you may just miss it. The Swizz Army 6-in-1 stores and displays intermittent information until you reset it! It tells you which line has a problem!
