Virtual Guitarist 2

Read Me – Universal Binary Update

Steinberg Media Technologies GmbH
April 2007

| **What is new?** | This Universal Binary update brings compatibility for Intel- and PowerPC-based Macintosh computers. |

Download instructions

- Download "**VirtualGuitarist2_UB_Update.dmg**" file to your desktop.

- Double-click "**VirtualGuitarist2_UB_Update.dmg** "

- The folder includes multi-installer for VST, AU and Rewire.

Installation

[1] Installation of Syncrosoft Licence Software

If you have already installed your Syncrosoft Licence Control Software please continue with step [2].

- Double-click the "SyncrosoftLicenceControl.mpkg" file located in the "Copy Protection Driver" folder of your product DVD. Follow the on-screen instruction.

- Make sure to have your Steinberg Key connected to your Mac.

[2] Installation of Virtual Guitarist 2 Universal Binary Plug-In

- Please double-click "**Virtual Guitarist 2 Setup**" to launch the installer.

- Follow the on-screen instructions.

[3] Installation of Virtual Guitarist 2 Content Data

- Please drag the folder **"Virtual Guitarist 2 Content"** from your product DVD onto your hard disk. You can put the folder anywhere you like, including external hard drives.

- When copying has finished, please open the **"Virtual Guitarist 2 Content"** folder on your hard drive and double-click the file **"Set VG2 Content Location".** This tells the plug-in where to find the data.

Technical Support

Steinberg product specialists are also on hand to provide individual assistance at:

www.steinberg.net

Please note, in order to receive technical support and information, you have to register your product after Installing.
